Ours is a team of well qualified and experienced professionals specialized in various disciplines, they are constantly in touch with various consultants/ interior designers and client organizations by offering complete package for specific projects in accordance with the laid-down specifications.

Al Qudrah Products are dedicated to combining a commitment to outstanding design in lighting solution and we carry the entire range with the highest technical and quality standards. All of our products help you to choose the correct luminaires for space considering the target color, mood, comfort, glare, task with the exceptional quality you can expect out of our products.

Domestic

1. LED Classic Bulbs

Everywhere we can see lamps of different sizes and shape. The evolution of lamps from Incandescent to Fluorescent to CFL and now to LED. Every time you buy a bulb as new or replacement. Think.. LED are 4 times life and 85 % energy saving along with no harm to eco systems, the brightness, life and efficiency is much better than any other brands in the world. With wide variety of wattage and different bases, you can replace any existing light source with our LED bulbs.

2. LED High Glow bulbs

In everyday life variety of applications and designs are increasing rapidly. To suit different needs of lighting, we have excellent range of bulbs which includes full glass, PC and different colour temperature. We have, E27 and E14 bases to suite the fittings. Bulbs with different size, colors, base and shapes

3. LED Tube Light

Lighting at home is very important but easy to miss on the up gradations. Everyday usage of tubes becomes the real effective side of lighting at home. Tubes which are the most common and highly used may consume a major part of power. Shifting to LED not only saves a lot of energy but also provides a great ambience. Next time, when you look at a tube, think of LED and it will change the whole home. Inside and outside home, pathways and everywhere you need LED Tubes.

Commercial

1. LED Downlights

The world of offices and working lives are rapidly changing. LED lighting offers great support for the challenges today faced by the stressful world of work. With extensive variety, shape and design, use of colors, dynamic effects in intensity and direction, and creating spaces for every employee in the organization with maximum level of comfort for working. On top of this, LED brings great energy saving and special needs where people are stuck to monitors for the whole day.

2. LED COB/SMD Lights

Chip on board (COB) are specifically designed for focused lighting in all directions and power. When you need focused lighting to ceiling or to the wall or to the floor we have COB lighting. Museums, Churches, temples and Exhibitions need special focused lighting. Wide range of designs, wattage and colour temperature provides designers all the lighting solutions.

3. LED Spot Lights

Conventional Spot lights and drop lights consume lot of energy and produces heat which acts against air conditioning. LED saves huge amount of energy in these range of products and provided maximum efficiency due to the unidirectional property. With high flexibility of manufacturing, LED can generate lights in any type, color and moods. We have complete range of lighting suitable for any type of applications and wattage.

4. LED Focus Light

Beauty of art is seen when focused and nothing to beat LED in focused lighting. Irrespective of rooms, pictures, sculptures, dining and retailing LED provides a comprehensive solution for every need of focused lighting. Al Qudrah provide extensive range of pointed and focused lighting with extra ordinary accuracy and precision in light. LED easier than you could possibly imagine, enhances the value of creations to the best in your collections with the power of light. With our range of products suiting to every need of an architect, it will bring out the real dreams in your mind. Irrespective of size, place and ambience, we have solutions with all angles and

colors.

5. LED Ceiling Light

Done right, landscape lighting makes the best of what you've got by highlighting your home's architectural features and drawing attention to prized plantings and trees. With our LED range of Outdoor lighting you will never feel like going inside. It's amazing that the difference a Ceiling light can make to your living. With the right Ceiling lighting, you can have a space that's perfect for doing everything – from reading a book to hosting game night. We provide you with everything in LED ceiling lights to enjoy anything.

6. LED Bulkhead Lights & Wall Lights

Outdoor Lighting is always a challenge due to different weather conditions and exposure to rain and heat. It also needs directional lighting like floor lighting, wall and for green ambience which require specific designs and installation methods. We take extensive care backed up with technology to address all these needs and to give long product life. LED makes maintenance free lighting suiting the best conditions for outdoor lighting. We have wide range of products in different sizes, shapes and wattage.

7. LED Striplights

Enchanting lighting is always an art than Science. LED is adding value to this thinking by providing suitable lighting and makes it fascinating and more adaptable with quick possibility of remote changing. We can provide a wide range of lighting strips that create a variety of colors, length, sizes and allow you to set the right scene for every occasion. LED solutions can create a perfect environment for the function and celebrations. LED with flexible options for installation enhances the atmosphere with colors and brightness which creates a mood needed for the time and can be easily reused.

8. LED Streetlights

The Lighting industry is looking for innovation every day with raising expectations from the customers mainly for outdoor lighting covering large areas. We can provide you unimaginable levels of attractions for creating all types of light levels along with efficiency in outdoor lighting. Another major achievement is the largest energy savings potential considering the conventional lamps and fixtures. We can easily move together to LED that provides least maintenance, long life and attractive designs with the power of lighting solutions. We will help you to create a complete new lighting experience for any type of outdoor lighting like gardens, streets, sports and function areas.

Industrial

1. LED Floodlight

Large area lighting is always a demanding work and high consumption of energy. Stadiums, Showrooms, Lawns and many more open areas require extensive lighting. LED Flood Lights are so focused and with instant start are best suitable for large area lighting. With many colors and color temperature, it is also suitable for different applications like Sports, Celebrations and functions. Compared to conventional lighting more than energy conservation, long life and least maintenance are considered as very good features for lighting. Higher ratings of

power levels also keep the number of units required at low levels.

2. LED Highbay Lights

Industrial lighting is always a challenge due to high ceiling heights and large areas of lighting. LED provides very compact High Bay solutions for all the industry needs. Different industries require varied type of lighting and also precision in visibility. Wide range of LED High Bay is solution for many industrial applications. Long life and easy maintenance provides lot of cost saving to industries other than energy saving on reduced power consumption.
